Projects & Work Experience

InnovativeCodeLabs, ReactJS Developer Intern
February 2021 - April 2021

- Worked on sharetribe's Flex where I implemented new Components and corresponding Redux functionality for proper state management and providing backend data to the components
- Built reusable components
- We (team of interns) also created a few projects using Sharetribe's Flex like GoHunting.

IELTS-At-Home Project

- Built using React-Native, JavaScript, HTML5 & CSS3
- Implemented the front-end in React-Native
- Created using firebase-firestore-database and react-native-elements
- Github link
- Visit App

Weather App

- Build using JavaScript, HTML5 & CSS3
- Implemented the AJAX call that retrieves data from the OpenWeather API.
- Github link
- Visit App

Recipes-Tracker

- Personal Website for Recipes which allows customers to see all available products.
- Build with JavaScript HTML5 & CSS3
- Realized catalog page and designed the logic to allow the user to filter their searches.
- Use of Fetch API to get the data.
- Github link
- Visit App

Education

- Bachelor of Technology in Computer Science & Engineering
  Kurukshetra University, Haryana, India
  2017-2021
